Characteristics and principle of action:

ActiMag Meadows and Pastures is a new generation fertilizer with high content of magnesium and sulphur containing chelates (i.e. in the form of organic trace elements).

ActiMag Meadows and Pastures This unique, balanced composition that provides versatile action and supply the plants with appropriate, precise dose of micronutrients needed for normal growth, with a single product.

ActiMag Meadows and Pastures is a perfect fertilizer for extra root nutrition of meadows and pastures throughout the growth period.

ActiMag Meadows and Pastures is a full dose of magnesium and sulphur.

ActiMag Meadows and Pastures is complete solubility.

Application:

- as a separately water solution,
- with urea,
- with foliar fertilizers,
- with suitable pesticides at the lower dose recommended,
- by the manufacturer.

Results of use:

- effective and rapid prevention of micronutrient deficiencies,
- reducing susceptibility of plants to infection,
- reducing the use of pesticides,
- higher yields.

The fertilizer is intended for use in meadows and pastures cultivation.

Product	Nutrient% [m/m]									
	N	Na ₂ O	MgO	SO ₃	Zn	Cu	Mn	Fe	B	Mo
ActiMag Meadows and Pastures	7.40	6.10	9.10	18.2	0.7	0.1	1.5	3.5	0.15	0.01

ActiMag Meadows and Pastures

Recommended applications:

Crops	Fertilizer application periods	Dose [kg/ha]	Working solution [l/ha]
Meadows	1 - first treatment in the tillering phase; 2 - Follow-up treatments after each swath; 3 - at the turn of September and October, to ensure better winter survival and a greater number of shoots in the spring;	6-8	300-500
Pastures	1 - first treatment in the tillering phase; 2 - Follow-up treatments after each grazing (rest period from fertilization until next grazing, approximately 2-3 weeks) 3 - at the turn of September and October, to ensure better winter survival and a greater number of shoots in the spring;	6-8	300-500

Preparation of a working solution: continuous mixing, in a spray tank half filled with water, dissolve urea, **ActiMag Meadows and Pastures**, other foliar fertilizer, and pesticide. The prepared solution should be used within few hours from its preparation, preferably during cloudy days or in the morning or in the evening. It is recommended to dose **ActiMag Meadows and Pastures** according to information presented in the table. Other components of the working solution should be dosed in accordance with the recommendations of the manufacturers in the lower recommended

Arkop

We build our experience in the fertilizer industry since 1992. Our goal is to manufacture fertilizers making it possible to derive the very best nature has to offer... For this reason, we offer you a wide range of products based on the latest biotechnology solutions, in particular high-grade chelates (chelate degree certified by PCBC).

Long-term cooperation with scientific institutions and universities resulted in the proven and effective product range. We constantly monitor the production process and respond to any changes and suggestions, we continuously expand our offer and adapt it to individual customers' needs.

Arkop quickly became synonymous to high quality we have obtained not only through cooperation with universities and scientific institutions, but also by introducing innovative technological solutions based on our in-house research and experience. Therefore, all our products meet quality and ecology standards adopted in the European Union. We use and continuously develop an integrated quality and food safety management system **ISO 22000 (HACCP)** and **ISO 9001**. As evidence of compliance with the most stringent requirements in this field, we have obtained the certificate of integrated management system - **Quality and Food Safety - HACCP - PN-EN ISO 9001 and PN-EN ISO 22000 - Certificate No. JH-178/2/2010**. We also have a certificate of European quality system for feed additives and premixes **FAMI-QS**. Currently, we are working with customers from all over the world.
